## milieu

### Content

Viscose Polyester Detergent

### Material

Viscose Viscose fibre is produced from cellulose pulp. Cellulose is dissolved in alkaline solution by a chemical reaction with carbondisulphide and then spun to fibres in an acid spinning bath. The fibres are washed, dried and cut to intended fibrelength. Polyester Polyester fibre is produced from terephtalic acid and ethyleneglycol, which react through condensation to polyester resin. The molten resin is spun to fibres through spinnerettes and cooled with air. Fibres are then cut to intended fibrelength. DetergentThe product contains a fragrance-free detergent, comprising:Ethylalcohol, non-ionic surfactant, amphoteric surfactant, odour neutraliser, preservatives, antifoaming agent and pH adjuster. The surfactants are fully biodegradable. The preservatives may be toxic to aquatic organism. Do not dispose in nature

Date of issue 2009-03-17 Art.no 190594

Revision date

### Production

This product is produced for SCA in China. The production site is BRC accredited

### Destruction

Disposal considerationsWhen delivered, the product is not regarded as hazardous waste, as defined within EU directive 91/689/EEC, and may be disposed with normal household waste. If the product is used in industrial processes and similar environments, it may be contaminated with substances which require special disposal handling.Contact local authorities before destruction.
