

Amabilia Pro Hybrid Gloves – Blue

CE 2777

The innovative hybrid material is a patented blend of vinyl and elastomer (equivalent to nitrile) that combines both the materials' unique advantages. Elasticity and tactile sensitivity are reminiscent of traditional nitrile, and tensile strength and durability are significantly higher than for regular vinyl. Very good fit. Complies with the high medical safety standards or protection against bacteria, viruses, microorganisms and various chemicals, and also approved for food handling, including acid, alkali and oil.
